# NEED TO TEACH IN ENGLISH ?

## WE CAN HELP

## TEACHING IN ENGLISH MEANS TEACHING ADAPTATIONS

Teaching in a foreign language may pose a number of challenges.

The TEA project – Teaching in English for Academics – has been developed to help you feel more confident and make a smooth transition to teaching in English.

Teaching in a foreign language requires a certain number of methodological adaptations such as :

- Adopting interactive teaching techniques so as to put the students at the center of learning
- Paying attention to pronunciation and rate of speech
- Implementing more group work to promote interaction between the students themselves for developing content through the use of the foreign language
- Scaffolding the course i.e. providing the students with all the supporting documents that may help them to better understand the content : glossaries, books, articles and/or authentic videos
- Helping the students develop the language skills they need for exams

## WHAT THE TEA PROJECT OFFERS

The TEA project aims to ensure quality teaching and to offer efficient support to any professor or teaching assistant who teaches in English. It consists of :

- Classroom observations with pedagogical and linguistic feedback upon request
- One-to-one weekly courses with a native English speaker to improve oral fluency
- Teacher training seminars to raise awareness of appropriate teaching methodology and explore the practical adaptations required for teaching in a foreign language
- Online modules with podcasts available on the Université Virtuelle website to prepare and consolidate the competences acquired during the seminars

If you adopt the right teaching methodology, this challenge will be met and this whole adventure will be beneficial for you and your students.
